Subject: RM 10.9 Removal Action Data Question

Stephanie:

Herding the "data cats" today in contemplation of submitting recent RM 10.9 RA data to EPA next week.

We (Hill/ddms) have received analytical data for TCLP testing requested by Clean Harbors for acceptance of RM 10.9 RA sediment at their Oklahoma Landfill. Should these data be submitted to EPA even if they were not subject of the RM 10.9 QAPP Addendum D? Same question for the stabilized sediment TCLP data generated by Clean Earth during the NJDEP-requested bench scale testing (to determine the sediment/cement ratio for stabilization).

We are assuming that the RM 10.9 pore water data will be submitted to EPA since it is associated with the cap design.

Let us know -

Thx,
Bill P.
